

# Discover the Arachnids

Read the sentences below. Visit our Easy Science for Kids pages [Spiders](#), [Mites](#), [Ticks](#), [Scorpions](#), and [other family member](#) to find the missing words. Write them in the empty spaces and find these hidden words in the puzzle!

[Words might be hidden horizontally, vertically and perhaps even back to front...!]

1. Scorpions are so tough that they can be put in a \_\_\_\_\_ overnight and spring back to life.
2. A female spider might eat her \_\_\_\_\_ because she sees it as lunch, not a mate.
3. Dust mite allergies can cause \_\_\_\_\_, sneezing and skin rashes.
4. Some ticks have \_\_\_\_\_ feeding tubes so they are hard to dislodge.
5. Most arachnids can only eat \_\_\_\_\_ food. They inject a special liquid into their prey that turns the prey's insides to \_\_\_\_\_.
6. Spiders can't \_\_\_\_\_ up prey. Instead, they inject a substance into their prey that dissolves the animal's insides.
7. Scorpions glow under an \_\_\_\_\_ light. This ability to glow in the \_\_\_\_\_ probably attracts insects.
8. Scorpions can slow down their \_\_\_\_\_ when food is scarce. They can survive on only one \_\_\_\_\_ each year.
9. All arachnids have eight \_\_\_\_\_, or four pairs of legs. Their bodies are divided into two parts – the head and the \_\_\_\_\_.
